BASIC-ABSTRACT:

An oral liquor capable of promoting a child's intelligence comprises the Chinese medicines: dried rhizome of wild Dioscorea opposita, acanthopanax root and millettia speciosa. The oral liquor can directly participate in the cerebrocellular metabolism, promote the memory of intracerebral hippocampal gyrus, increase the cerebrocellular energy and vitality, and can effectively promote a child's intelligence. The liquor has a long shelf-life, convenient administration, is non-toxic and contains no hormones. The product is most suitable for children of 3-16 years old to take, and their intelligence quotient value generally can be promoted by 20-40%.
